SANGAM 2.0 — SEEDANCE 2.0 PROMPT SET (5-SECOND SCENES) · v3

Mascot finalized. Each scene now tagged with the exact expression/pose from your reference sheet to use as the image reference.

Per-clip runtime: 5s each | **Total scenes:** 24 | **Total runtime:** 2:00 | **Aspect ratio:** 16:9 | **Rule:** no literal on-screen UI text anywhere except the character's own chest badge (which is intentional branding) — everything else stays abstract; add any additional real branding in post.

🔒 LOCKED MASCOT BLOCK (paste into every single prompt below)

> A small hovering robot character with no arms or legs, in clean 2D vector illustration style with bold black outlines and soft cel-shaded highlights (not flat-flat, not 3D-rendered — a polished modern explainer-video illustration look). Glossy white dome-shaped helmet head fused directly into a wide white shoulder section, with a dark, almost-black rectangular visor screen embedded in the face showing simple glowing cyan/mint eye-icons that change shape to express emotion. Below the shoulders, a black torso housing tapers down to a flared black skirt-base. A blue wing-shaped fin panel extends from the left side of the torso and a green wing-shaped fin panel extends from the right side, both angled slightly outward like small stabilizer wings. Centered on the black chest is a circular white badge outlined in a soft cyan glow, containing a dimensional ribbon-style infinity symbol: the left loop rendered in shades of blue, the right loop in shades of green, crossing at a small white circular hub in the center. Below the icon, "SANGAM 2.0" appears in bold navy text, with a thin tagline beneath it. Thin glowing cyan seam-lines trace the neckline and torso edges. The character hovers with a bright cyan-teal thruster glow at its base, casting a soft glow ring on the ground when idle and a stretched light-streak trail behind it when moving fast. Palette: white, black, cyan/mint glow, blue fin, green fin, navy badge text. Premium, friendly, confident — modern brand-mascot illustration style.

> ⚠️ **Badge accuracy note:** the real Sangam 2.0 logo also contains a small circular emblem (the Ashoka Chakra) at the center hub and precise wordmark typography — detail this fine, especially combined with small text, is exactly where Seedance's known text-rendering weakness (glyph-soup on small/dense text) will show up worst. Don't rely on the model to render it exactly. Two options: **(a)** generate with the simplified description above (color/shape only, no fine detail) and composite the real logo file over the badge in post on every clip — the reliable path; **(b)** attempt the fuller detail and expect to touch up in post regardless. Recommend (a).

Expression key (matches your reference sheet — specify per scene below): `Happy` (arched closed smiling eyes) · `Thinking` (single flat eye + ellipsis, thought bubble) · `Determined` (angled fierce narrow eyes) · `Confused` (dot eye + question mark) · `Excited` (sparkly >< eyes + motion lines) · `Wink` (dot eye + dash eye) · `Loading` (three dots) · `Heartbeat` (EKG pulse line) · `Idle Hover` (neutral happy, ground glow ring) · `Tilt` (happy, leaning) · `Boost` (determined, motion streak trail)

PART 1 — COLD OPEN (2 scenes / 10s)

Scene 1.1

Reference: Thinking + Idle Hover. 5s. [MASCOT] with the **Thinking** expression (flat eye, ellipsis, small thought bubble), alone in a dark navy-green void with scattered glowing dot-particles, no ground or walls. Slow push-in from wide to medium. The mascot hovers gently with a small idle bob, visor cycling briefly through the Thinking icon. Clean 2D vector animation, minimal, no text besides its own chest badge.

Scene 1.2

Reference: Happy. 5s. [MASCOT] switching to the **Happy** expression (arched smiling eyes) as it turns to face camera, a simple ring of light expanding outward from its body and seeding the dark space with small golden dot-lights appearing one by one. Slow camera drift. Clean 2D motion graphics, warm dots against cool navy background, no text.

PART 2 — EVENT TRACKER: CREATION (3 scenes / 15s)

Scene 2.1

Reference: Determined. 5s. [MASCOT] with the **Determined** expression, inside a control-room scene of translucent floating panel shapes glowing mint-green, arranged in a loose arc. Camera orbits at a low angle. The mascot tilts toward one blank panel; it fills with soft rounded glowing card outlines and simple flat glyph icons (a calendar shape, a location-pin shape) appearing in sequence — no readable text. Clean vector UI style, no logos besides the mascot's own badge.

Scene 2.2

Reference: Determined. 5s. [MASCOT], still **Determined**, beside a panel where two colored ribbons of light — one vivid blue, one vivid green (matching the two brand colors on its own chest badge) — weave together into a single braided ribbon, representing two teams merging into one plan. Camera pushes in on the braid. Clean flat motion graphics, bold color blocking, no text.

Scene 2.3

Reference: Happy. 5s. [MASCOT] shifting to **Happy** beside a third panel where small plain glowing circle-avatars appear one by one and arrange into a loose group. Its visor brightens with the Happy icon, thruster-glow pulsing once. Steady medium shot, clean 2D style, no text.

PART 3 — DASHBOARD: COMMAND CENTER (2 scenes / 10s)

Scene 3.1

Reference: Idle Hover. 5s. [MASCOT], neutral **Idle Hover** expression, hovering above a large circular floor of glowing concentric ring outlines, with small glowing card-shapes in a loose grid above it. Crane-style descent into a high top-down angle. Cool blue-green palette with warm highlight accents on each card. Clean vector animation, minimal, no text.

Scene 3.2

Reference: Happy. 5s. [MASCOT] switching to **Happy** as a new glowing card rises from the center ring and slots into the grid. Small approving bob, chest badge pulsing once. Top-down angle holds steady. Clean 2D motion graphics, minimal, no text.

PART 4 — APPROVAL WORKFLOW (3 scenes / 15s)

Scene 4.1

Reference: Thinking. 5s. [MASCOT] with **Thinking** expression beside a loose ring of small glowing circle-avatars connected to the center by thin lines of light. Medium shot, camera steady. Avatar-circles pulse and shift to warm gold one by one as connecting lines brighten — responses coming in. Clean flat particle-network animation, no text.

Scene 4.2

Reference: Confused → Wink. 5s. [MASCOT] briefly showing **Confused** (dot eye + question mark) as one avatar-circle flickers cool, then switching to **Wink** as it brightens again and rejoins the group with a soft ripple of light. Camera slowly pushes in. Clean synchronized pulse animation, calm pacing, no labeled icons.

Scene 4.3

Reference: Happy. 5s. [MASCOT] at **Happy** as a glowing ring spins around one avatar-circle like a countdown, blooms into a bright pulse, and a ripple of light passes through the whole ring as all avatars glow together. Wide steady shot. Warm resolution color palette, clean 2D motion graphics, no text.

PART 5 — TRANSITION (1 scene / 5s)

Scene 5.1

Reference: Boost. 5s. [MASCOT] switching to **Determined** and entering **Boost** pose as it turns from the glowing command scene, the panels dimming and folding away like closing paper petals, then streaking forward toward an open bright horizon of light with its full motion-trail visible. Side-tracking camera shot. Minimalist transition, warm horizon gradient, clean 2D animation.

PART 6 — LEAD: ARRIVAL IN THE FIELD (2 scenes / 10s)

Scene 6.1

Reference: Happy. 5s. [MASCOT] at **Happy**, now outdoors in a warm flat-illustrated open field with stylized crop rows swaying gently. Wide establishing shot, golden-hour palette, camera moving forward at eye level toward a small gathering ahead. Clean flat illustrated outdoor style, gentle parallax layers.

Scene 6.2

Reference: Idle Hover. 5s. [MASCOT] arriving at a semi-circle of simple silhouette-figures gathered in the field, hovering gently into the center of the group at **Idle Hover**. Smooth camera settling into a steady medium shot. Warm golden lighting, soft silhouette crowd, friendly and welcoming, no UI overlays.

PART 7 — LEAD: FIELD EXECUTION (3 scenes / 15s)

Scene 7.1

Reference: Determined. 5s. [MASCOT] at **Determined**, among the gathered silhouette-figures as small glowing dot-particles rise in a gentle stream above the group — attendance being recorded. Medium shot, warm golden palette, particles drifting upward. Abstract data visualization, no numerals, no text.

Scene 7.2

Reference: Excited. 5s. [MASCOT] switching to **Excited** (sparkly eyes, motion lines) as a simple shutter-shaped flash of light blinks once nearby, leaving a small glowing square afterimage that fades — a photo being captured. Close-up on the mascot's reaction. Soft warm flash, clean flat illustration style, no literal camera object, no text.

Scene 7.3

Reference: Happy. 5s. [MASCOT] at **Happy**, gesturing with a small body-tilt as a single bright dot of light rises from the gathering like a firefly and drifts upward out of frame. Camera tilts up following the light. Warm-to-cool color transition, clean 2D animation, emotional beat.

PART 8 — LEAD: ADDITIONAL CAPABILITIES MONTAGE (3 scenes / 15s)

Scene 8.1

Reference: Loading. 5s. [MASCOT] at **Loading** (three pulsing dots), hovering low over a stylized dark terrain map with a patchwork of small glowing village-shaped light-dots scattered below, each pulsing softly. Aerial tracking camera moving smoothly forward. Cool-toned night palette, clean 2D data-map visualization, no text.

Scene 8.2

Reference: Happy. 5s. [MASCOT] at **Happy** beside a single glowing silhouette figure, a gentle handshake-shaped pulse of light passing between them, followed by a small sprouting-plant glyph blooming softly nearby. Medium shot, warm intimate palette. Clean 2D illustration, no text.

Scene 8.3

Reference: Wink. 5s. [MASCOT] at **Wink** as a single glowing checkmark-shaped pulse of light appears gently over a silhouette figure, confirming trust and agreement, then fades softly. Calm close shot. Warm resolution lighting, minimal, no text.

PART 9 — CAMPAIGN POSTER SHOWCASE (3 scenes / 15s)

Scene 9.1

Reference: Idle Hover. 5s. [MASCOT] small in frame at **Idle Hover**, drifting through a dark gallery-style scene past a large glowing vertical poster-canvas, color-blocked in rich vivid blue with a stylized botanical seed-shape rendered in soft light — no readable text, no real product imagery. Slow cinematic pan past the canvas, single spotlight glow. Clean gallery-launch aesthetic.

Scene 9.2

Reference: Happy. 5s. [MASCOT] at **Happy**, pausing before a second glowing canvas where the blue tone from the previous canvas smoothly blends into vivid green, a simple botanical vine or leaf silhouette forming as the colors merge — visually echoing the blue-to-green merge on its own chest badge. Steady wide shot as the mascot's visor brightens appreciatively. Clean spotlighting, premium campaign aesthetic, no text.

Scene 9.3

Reference: Wink. 5s. [MASCOT] at **Wink**, drifting past a final canvas glowing rich vivid green with a simple leaf-and-seed motif, before turning back toward camera with its chest badge glowing warmly — the same blue-and-green pairing now visible on both the canvas and the badge. Slow pan-out to a wider shot. Clean gallery animation, no additional logos, no text.

PART 10 — CLOSING (2 scenes / 10s)

Scene 10.1

Reference: Idle Hover. 5s. [MASCOT] returning to the calm starlit scene from the opening, now filled with warmer, more numerous golden dot-lights. Slow symmetrical pull-back mirroring the film's opening move in reverse. Palette shifting from cool navy to warm gold, sunrise-like. Clean bookend composition, calm and premium.

Scene 10.2

Reference: Happy. 5s. [MASCOT] at **Happy**, coming to rest, facing camera directly, small idle bob, chest badge glowing softly, before the frame gently fades toward warm golden light. Static centered camera, slow fade. Warm sunrise palette, clean emotional close — wordmark/tagline already visible on the badge itself; no additional text needed.

LOCKED BRAND COLOR PALETTE (from your actual logo files — do not deviate)

Every scene in this script now pulls only from this palette. No orange, no maroon, no purple anywhere.

Source	Color	Used for
Bayer logo	Vivid blue	Crop Protection team accents, left-side ribbon/canvas color
Bayer logo	Vivid green	Secondary accent, blends with Seminis green
Seminis logo	Deep leaf green	Seminis team accents, right-side ribbon/canvas color
Sangam 2.0 logo	Blue-to-green gradient	The mascot's own chest badge, and the visual "merge" moment in Scenes 2.2 and 9.2
Sangam 2.0 logo	Navy	Wordmark text on the badge
Sangam 2.0 logo	White	Badge background, mascot body
—	Cyan/mint glow	Mascot visor, thruster, and UI panel glow — this one stays separate from the brand blue/green since it's the character's own "tech" accent color, not a brand mark

The only warm-toned color left anywhere in the script is the "golden" light-points in Scenes 1.1, 1.2, and 10.1 — that's atmospheric sunrise/hope lighting representing farming communities, not a brand color, so it's intentionally kept separate from this palette.

BRAND ASSETS — HOW TO HANDLE EACH LOGO

You now have three real logo files. They need three different treatments — don't feed all three into Seedance the same way.

1. Sangam 2.0 logo (`sangam_2_0.jpeg`) This is the mascot's own chest badge — it's meant to appear in every single clip. Use the simplified description in the locked mascot block for generation, then composite this real file over the badge area in post for every clip. Generating it fresh 24 times will never match this file exactly clip-to-clip; compositing once as a post step guarantees it's identical everywhere.

2. Bayer logo (`bayer_logo.jpeg`) and Seminis logo (`Seminis_logo_2.png`) Do **not** put these into any Seedance text prompt, and do not feed them in as generation references. Real corporate trademarks are exactly the kind of content Seedance's IP/brand filters are built to catch — attempting to generate them risks the clip being rejected outright, and even if it isn't, small trademarked wordmarks are the worst case for the model's text-rendering weakness. These two only ever appear as **post-production overlays** — composited in, never AI-generated.

Where they'd actually go in the film: neither logo has a natural place in the current 24 scenes (the mascot and abstract visuals carry the story). The one place they'd add something is an optional **closing beat after Scene 10.2** — a simple post-production graphic where the real Bayer and Seminis marks converge into the real Sangam 2.0 mark, visually paying off the "when two strengths move as one" line. That's a static/simple after-effects composite, not a generation task — happy to write the exact copy/timing for it if you want it added.

PRODUCTION NOTES

- **Seed/settings lock:** run Scene 1.1 and Scene 10.2 first as a pair — they bookend the film and share the closest visual match.
- **Use image references, not text-only:** for every clip, attach the matching cropped expression image from your reference sheet (see asset list below) alongside the text prompt. This is far more reliable for consistency than the text description alone.
- **Front-view-only gap:** your reference sheet only shows front-facing poses. Scenes with side/three-quarter camera orbits (2.1, 3.1, 9.1–9.3) are the highest risk for the model guessing an inconsistent side/back design. If early tests drift, either get a 3/4-angle turnaround generated first, or simplify those camera moves toward front-facing framing.
- **If a clip renders garbled text/UI:** negative prompt: *no text, no numbers, no extra logos, no readable UI, no icons with labels* — except the mascot's own chest badge, which should stay as-is.
